Newsletter

Dear colleagues,

we would like to draw your attention to the next International Liquid Crystal Conference, ILCC2012, to be held from August 19 to August 24, 2012 in Mainz, Germany

<http://www.ilcc2012.de/>

In addition, and parallel to the traditional general liquid crystal topics, we will cover some frontier areas to adjacent fields by establishing Special Symposia on

- Shape memory elastomers
- Self-organization in opto-electronic materials
- Liquid crystal aspects of active media
- Liquid crystal aspects of bio-polymers and bio-membranes

with the expectation of mutual benefits for the liquid crystal community and researchers from organic opto-electronics, actuators, active biological dynamic patterns, and bio-mimetic and bio-inspired organic structured materials.

-> the preliminary list of invited speakers (<http://www.ilcc2012.de/scientific/invited.htm>) will be completed in due time by choosing exceptional contributions from the submitted abstracts

-> the abstract submission (<http://www.ilcc2012.de/abstracts.htm>) starts on December 19

-> the registration (<http://www.ilcc2012.de/registration.htm>) will be open from January 4

With the hope to welcome you next August in Mainz
we remain with the best wishes for the coming holiday season

Harald Pleiner and Rudolf Zentel
(for the organizers of ILCC2012)
