

## 24<sup>th</sup> International Liquid Crystal Conference

# ILCC 2012

August 19<sup>th</sup> - 24<sup>th</sup> 2012, Mainz, Germany

*Invitation to Sponsors and Exhibitors*

*Dear Sponsors and Exhibitors,*

the 24<sup>th</sup> International Liquid Crystal Conference will bring together the scientific community working in the interdisciplinary field of Liquid Crystals, or mesophases in the broader sense. This community ranges from classical synthetic chemistry to theoretical physics, from structural biology to engineering applications, and is linked by the interest in various aspects of soft matter. Liquid Crystals are nowadays almost omnipresent not only in many, very different fields of science but also, maybe more important, in everyday life. This conference will provide a common platform for demonstrating and discussing new developments as well as to connect science and industry to start fruitful and beneficial cooperations.

With your participation in the ILCC 2012 Exhibition you support this important field of technology and present your company in a setting of excellent research. Furthermore you'll have a great chance to get in touch with your employees of tomorrow as many doctorate students will attend the conference as well.

Please find some standardized packages on the following sides which might suit your interests but let us note that we're always open-minded for your suggestions and will do our very best to fit your needs and demands. If you have any questions, please don't hesitate to contact us.
